Opulent

Opulent AI

Self-Driving Knowledge Work

Opulent, the AI Knowledge Worker

Trusted by leaders across the world

CTO Multinational food supplier	**CEO** Product research institute	**VP Operations** Power equipment manufacturer
Managing Partner Search fund and acquirer	**Owner** Precision job shop	**Founder** Critical materials advisory
Founder Event and sponsorship agency	**Managing Director** National investor community	**Principal** Management consultancy

Supported by and partnering with

NVIDIA · Google · aws · Daytona · E2B · ramp · stripe

Cloud, models, agent infrastructure, and payments.

Founded by a team with a long history of AI innovation at large institutions

Google · OpenAI · WRITER · SIERRA · accenture · Parloa

THE PROBLEM

AI capability outpaces economic value.

Frontier AI is advancing faster than the economic value it delivers.

$37B
Enterprise AI spending

Knowledge work has yet to match autonomous software engineering's gains.

1.14
DBT Copilot actions per user per day

Organizations adopt AI but fail to capture its full value.

72%
DBT diary respondents satisfied with Copilot

23 ENGAGEMENTS · MOST FROM REFERRAL OR TARGETED OUTREACH · MARKETING STILL LARGELY UNTAPPED

THE OPPORTUNITY

Agents can now close the loop.

You set the outcome and limits. Opulent runs the work in your tools, checks the result, and brings exceptions back to you.

OUTCOMES OVER TASKS

Reorganize work around intelligence.

More capable models create value when organizations change how the work gets done.

Set outcomes, not task lists.

People define the result and its constraints. Agents decide the steps and improve how they get there.

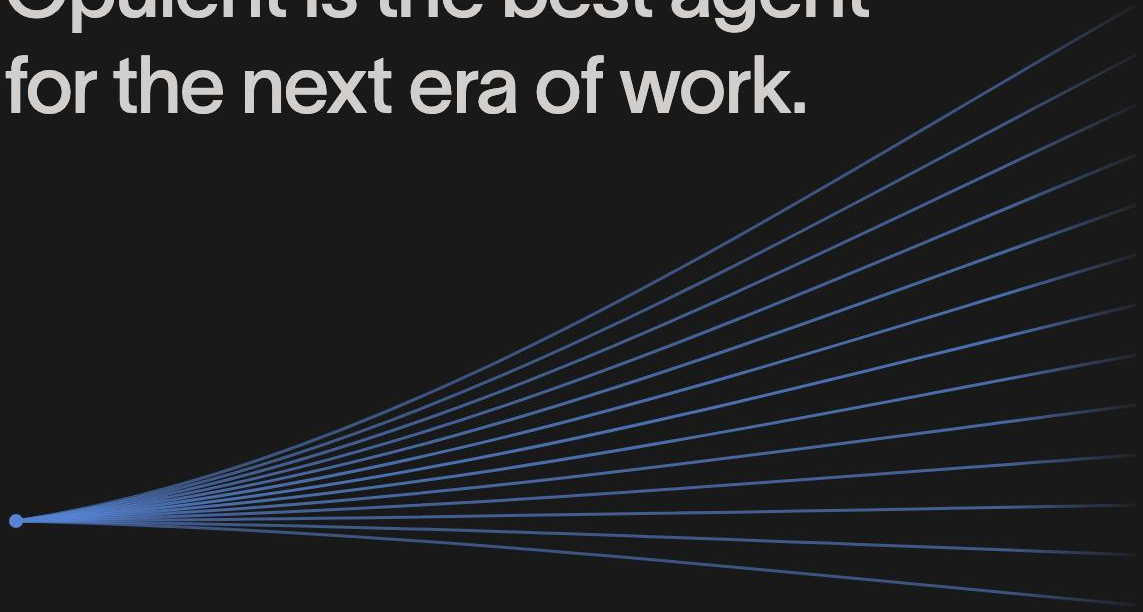

Keep working with context.

Agents work for weeks or months, using current business data and the rules people know but rarely write down.

WHAT IT TAKES TO RUN THIS IN PRODUCTION

01	Self-improving harness	Builds, orchestrates, and improves agents in production.
02	Persistent operations	Keeps work moving across runs, approvals, and handoffs.
03	Complex environments	Grading and credit assignment across month-long trajectories.
04	Delightful interfaces	People and agents working together by voice, chat, and screen.
05	Learns from reviewed work	Updates memory and procedures from accepted work.

Opulent is the best agent for the next era of work.

.01 Frontier performance for much less

A top model plans and checks. A smaller trained model does the work. Frontier results at a fraction of the cost.

.02 More intelligent in more places you work

Voice, Slack, email, and the tools you already use. It thinks in the cloud and works on its own machine.

.03 Works longer on harder problems

Big jobs split across many agents, checked, and merged into one result. It keeps going until done.

SAME STARTING POINT · THE DISTANCE COMPOUNDS

THE PLATFORM

The Opulent Platform.

What makes us better

RELEASED THIS QUARTER

- Voice mode
- Machines on macOS, Linux, and Windows
- Payments through Ramp
- Full computer use
- Scans and auto-triage
- Fusion model routing

MACOS

WINDOWS

UBUNTU

01

Everything you can do on a computer

Each agent works on a real computer, on any operating system. Desktop task success went from 12% to 85%.

02

Works longer on harder problems

One agent keeps the plan while helpers do the pieces. A thousand times the throughput, with far fewer mix-ups.

03

Better outcomes that cost less

A top model leads and a trained helper does the work. Each step runs on the model that fits it best.

04

Any file, any format, with history

Every change records who made it and why. Agents work side by side and undo cleanly.

05

Advanced human-agent collaboration

Voice, text, and threads, wherever you are. The agent reaches out first.

06

Builds, orchestrates, and improves itself

One plan splits the work across many agents. Checked merges lift accuracy over 7x.

THE ONLY KNOWLEDGE-WORK AGENT WITH ITS OWN MACHINE ON MACOS, LINUX, AND WINDOWS

HOW WE WORK WITH YOU

We use decades of experience bringing emerging technology to institutions
to bring organizations into the future

THE ENGAGEMENT

STEP 01

Opportunity audit

We understand how AI is making you better today.

DISCOVERY

STEP 02

Process redesign

We redesign core processes so agents run the work and your team directs it.

BUILD

STEP 03

Deployment

We connect your tools and teach Opulent the workflow, with clear review points.

LIVE

STEP 04

Optimization

Opulent uses results and feedback to improve how the work runs.

COMPOUNDING

CUSTOMERS

Engagements Spotlight

$25k

LEGAL · PARTNER

Legal workflows driven to full redline for a European firm.

AGREEMENT IN SIGNATURE

$10k

INDUSTRIAL POWER · CEO

Bills of lading run as a governed workflow.

CONTRACTED, 30-DAY REVIEW

$10k

RESEARCH INSTITUTE · CEO

Quarterly survey review against a holdout. Accuracy rose 7x.

IN DELIVERY

$5k

REGIMENT · EVENTS

Fifty IPO executives sourced on a fixed data budget, every path with evidence.

PHASE 2, FIXED FEE

TYPICAL RANGES BY INDUSTRY

Private equity
15 to 25% more qualified deals
Sourcing and diligence

Manufacturing
10 to 20% faster order to cash
Procure-to-pay

IT consultancies
93 to 99% faster time to billing
Parallel migrations

Tax strategists
15 to 30% more billable strategies
Review-ready analysis

Research boutiques
15 to 25% more billable output
Full-dataset research

Consumer goods
10 to 20% faster order to cash
Order and warranty intake

23 ENGAGEMENTS · ONE LOST · MOST FROM REFERRAL OR TARGETED OUTREACH

PARTNERSHIPS

Partners on every layer of the stack.

01 **Compute**

Daytona E2B

Designed machines on every operating system, with recorders and verifiers built in. E2B backs the sandbox layer with $20,000 in startup credits.

02 **Cloud and models**

aws

Partner programs carried the platform from first research to ready to scale on about $350,000.

03 **Payments and versioned work**

ramp stripe Mesa

One of the first five companies building on Ramp Agent Wallet. Design partners with Stripe and Mesa for agent payments and versioned documents.

04 **Commercial**

Atlantis Capital

Commercial strategy partner into private markets, portfolio sponsors, and their companies.

BUSINESS MODEL

Three types of customer engagements

CRAWL

Platform

Your team gets access, and every run keeps a record of what it did.

SEATS

FUSION ROUTING

Frontier results at a fraction of the model cost

WALK

Workflow

We put one workflow into production. You pay only for the runs you accept.

DEPLOY AND USAGE

REGIMENT DESK

About 5.6 credits and eight cents per qualified prospect

RUN

Transformation

We audit and redesign the work, then run agents across your teams.

ENTERPRISE TERMS

ACCEPTED WORK

The only unit we bill

Per-seat pricing bills the person. We bill the work completed, and each run costs less than the last.

GTM AND MARKETING

Everyone is GTM.

01

Everyone sells

Everyone helps win customers. Engineers give demos and founders deliver the work. Almost all 23 engagements came from referrals and outreach.

WARM NETWORK

02

Proof sells

We show buyers the work, the result, and what it saved the customer.

PROOF IN HAND

03

Opulent sells itself

Opulent finds prospects, drafts outreach, and follows up by email.

AUTONOMOUS PIPELINE

We reach the practitioners and the executives who own the outcome at once. Marketing is still largely untapped.

ROADMAP

From ready to self-driving.

JUL 2026

Opulent 2 ships

Our biggest release yet
Tests its own work
Fixes what it finds

Q4 2026

Opulent everywhere

Lives in your texts
Reaches out first
Every inbox, triaged

H1 2027

Swarms and RLMs

One plan, many agents
Proves every finding
Returns one answer

H2 2027

Self-driving agents

Fully self-improving
Runs its own experiments
Reacts to the results

WHERE THE RESEARCH GOES

- Self-improving harnesses
- Primitives for autonomous organizations
- Grading month-long work
- Human-agent interfaces
- Self-constructing ontologies

SELF-DRIVING KNOWLEDGE WORK · THE PEOPLE WHO KNOW THE BUSINESS SET THE OUTCOME AND CONSTRAINTS

Team

Jeremy Alston

CEO, FOUNDER

Led Accenture Ventures Midwest and the Center for Advanced AI, driving over $45M in emerging tech with Fortune 500 leaders.

Morgan Abraham

CIO, INNOVATION CO-FOUNDER

Two-time founder, four patents. Raised $7M at smoodi and took robotics nationwide.

Nathanel Chaouat

COMMERCIAL OFFICER

Ran Accenture's global robotics open innovation after a career in venture and private equity.

ADVISORS

Lot Serebour
Accenture & SKU'd Ventures

Dujon Smith
Accenture Ventures

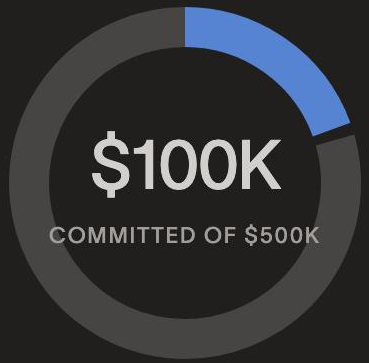

Andrew Jison
Google Cloud

Anthony Waelter
Former Deloitte Vice Chair

THE RAISE

Back self-driving knowledge work.

RAISE	COMMITTED	CEILING

USE OF PROCEEDS

01 Compute, training, and inference

02 Sales, FDE, marketing, and partnerships

03 Compliance and legal

THREE THINGS YOU HAVE TO BELIEVE

01 Most knowledge work will be done by agents, and buyers will pay for accepted work, not seats.

02 An agent needs its own machine, its own budget, and a record of every action before it can be trusted with real work.

03 The product and the way of working around it will decide this business. We run the company on Opulent for that reason.

$400K remains open. Diligence materials and references on request.
